Product description

The MHF15 is a compact optical level limit switch which is incredibly easy to commission. The sensor is based on the energetic SICK photoelectric proximity sensor technology, which has been proven and optimized over a number of decades. Thanks to this, the sensor construction is simple, robust and reliable. The use of high-quality materials such as stainless steel 1.4404 and polysulfone, together with the housing design to

enclosure rating IP 69K, guarantees the reliability of the MHF15 not only on the process side, but also in situations where there are adverse ambient conditions outside the tank. The fast, problem-free commissioning does not require medium calibration, allowing reductions in commissioning costs and maintenance. The optical technology makes the MHF15 particularly well-suited to use with water-based media.

At a glance

- Robust level monitoring in liquid media without additional requirements
- Small, compact design, no medium calibration required
- Process temperature up to 55 °C, process pressure up to 16 bar
- Enclosure rating IP 67 and IP 69K
- Process connection G ½
- Highly resistant thanks to stainless steel housing 1.4404, polysulfone apex
- Output available as PNP or NPN transistor
- FDA-compliant, UL

Your benefits

- Small, compact sensor also suitable for difficult installation conditions with limited space
- Quick commissioning without medium calibration saves time and costs
- Reduced maintenance, no recalibration required even after long periods of use, as system has no moving mechanical parts

Application information

Use in tanks (side mounting)

The distance $A \geq 40\text{mm}$ (1.57).

Sensor prism $B = 8\text{ mm}$ (0.31).

The conical prism is to project into the container.

Installation in a pipe for dry running protection. $A \geq 40\text{ mm}$ (1.57)

Note:

Strong surface-forming liquids can lead to deposits on the sensor and affect the function.

Applications with foam:

- Foam with low density can't be detected by MHF15.
- Foam with high density can be detected by MHF15 and can lead to faulty operation.
